

Committee Objective & Approach

GOAL

Identify water management challenges facing the AMAs and generate strategic solutions for 2025 and beyond

APPROACH

1. Reflect on the past 40 years of water management in the AMAs. Identify today's problems and challenges.
2. Propose solutions/strategies for addressing the challenges after 2025

Non-AMA Issues

A decorative background consisting of several thin, curved lines in shades of blue and grey, sweeping across the top and sides of the slide. On the left side, there is a blue speech bubble graphic containing the text 'We're in this Together'.

We're in this
Together

- Sound water management is critical to our future economy and welfare.
- Encourage honest, objective and open discussion.
- Utilize data to identify and define issues.
- Respect differences among AMAs.
